Use Case Flow

Register

Primary Actor: Student

Main Flow:

1. The Student opens the registration page.
2. The Student enters Student ID, personal details, contact details, academic details, parent details, and ID proof.
3. The Student selects the hostel and provides the required room information.
4. The system validates the entered details.
5. The system creates the student account.
6. The system confirms successful registration.

Alternative Flow:

4a. If any required information is missing or invalid, the system displays an error message and asks the Student to correct the details.
The flow returns to Main Flow Step 2.

4b. If the Student ID already exists, the system informs the Student and prevents duplicate registration.
The use case ends.

Login

Primary Actor: Student

Main Flow:

1. The Student opens the login page.
2. The Student enters valid login credentials.
3. The system verifies the credentials.
4. The system authenticates the Student.
5. The system displays the Student dashboard.

Alternative Flow:

3a. If the credentials are incorrect, the system displays an error message and asks the Student to try again.
The flow returns to Main Flow Step 2.

Manage Profile

Primary Actor: Student

Main Flow:

1. The Student opens the profile section.
2. The system displays the Student's profile information.
3. The Student views or edits the required details.
4. The Student updates the information.
5. The system validates and saves the updated details.
6. The system displays the updated profile.

Alternative Flow:

5a. If the entered information is invalid, the system displays an error message and does not save the changes.
The flow returns to Main Flow Step 3.

View Notifications and Announcements

Primary Actor: Student

Main Flow:

1. The Student opens the notifications section.
2. The system displays available notices and announcements.
3. The Student views the required notification.

4. The system updates the notification as read.
5. The Student can view emergency alerts, fee reminders, and maintenance alerts.
Alternative Flow:
2a. If there are no new notifications, the system displays that there are no new notifications.
The use case ends.

View Room Details

Primary Actor: Student
Main Flow:
1. The Student opens the room details section.
2. The system displays the allocated room information.
3. The Student views room capacity and bed availability.
4. The system displays the room maintenance status and related room information.
Alternative Flow:
2a. If room information is unavailable, the system displays an appropriate message.
The use case ends.

Book Common Facility

Primary Actor: Student
Main Flow:
1. The Student opens the common facility booking section.
2. The system displays the available facilities.
3. The Student selects a facility.
4. The system displays available date and time slots.
5. The Student selects a suitable slot and submits the booking.
6. The system confirms the booking.
7. The booking is added to the Student's booking history.
Alternative Flow:
5a. If the selected time slot is unavailable, the system asks the Student to select another slot.
The flow returns to Main Flow Step 5.
5b. If the facility is under maintenance, the system prevents booking and displays the maintenance status.
The use case ends.

Manage Fees and Payments

Primary Actor: Student
Main Flow:
1. The Student opens the fee and payment section.
2. The system displays fee details, due dates, fines, and dues.
3. The Student selects the required payment option.
4. The Student completes the online payment.
5. The system processes the payment.
6. The system updates the payment status.
7. The system provides a payment receipt and stores the payment in the payment history.
Alternative Flow:
5a. If the payment fails, the system displays the payment failure status.
The flow returns to Main Flow Step 3.
5b. If the payment gateway is unavailable, the system informs the Student that the payment cannot be completed.
The use case ends.

Manage Mess

Primary Actor: Student

Main Flow:

1. The Student opens the mess management section.
2. The system displays the weekly menu and meal schedule.
3. The Student views meal information.
4. The Student can register for meals where applicable.
5. The Student can view mess attendance, feedback, complaints, holidays, and mess fee information.

Alternative Flow:

2a. If mess information is unavailable, the system displays an appropriate message.
The use case ends.

Apply for Leave

Primary Actor: Student

Main Flow:

1. The Student opens the leave management section.
2. The Student selects the leave type.
3. The Student enters the date/duration and reason for leave.
4. The Student provides the required parent contact information.
5. The Student submits the leave application.
6. The system records the leave application.
7. The system displays the leave status and maintains the leave history.

Alternative Flow:

5a. If required leave information is missing, the system displays an error message and asks the Student to provide the missing information.
The flow returns to Main Flow Step 3.

Manage Laundry

Primary Actor: Student

Main Flow:

1. The Student opens the laundry management section.
2. The Student submits a laundry request.
3. The Student provides item details.
4. The system records the pickup and delivery details.
5. The system displays the request status and applicable charges.
6. The Student can view payment status and laundry history.

Alternative Flow:

2a. If the laundry request cannot be submitted, the system displays an error message and asks the Student to try again.
The flow returns to Main Flow Step 2.

Manage Lost and Found

Primary Actor: Student

Main Flow:

1. The Student opens the lost and found section.
2. The Student selects whether to report a lost or found item.
3. The Student enters item details, location, and date/time.
4. The Student can upload a photo of the item.
5. The system records the report.
6. The Student can search for reported items.
7. The Student can claim or return an item where applicable.

Alternative Flow:

3a. If the required item information is missing, the system asks the Student to provide the missing details.
The flow returns to Main Flow Step 3.
6a. If no matching item is found, the system displays an appropriate message.
The flow returns to Main Flow Step 6.

Submit Complaint

Primary Actor: Student
Main Flow:
1. The Student opens the complaint management section.
2. The Student selects the complaint category.
3. The Student enters the complaint description.
4. The Student attaches supporting information if required.
5. The Student selects the complaint priority.
6. The Student submits the complaint.
7. The system records the complaint.
8. The Student can track the complaint status.
Alternative Flow:
6a. If required complaint details are missing, the system displays an error message and asks the Student to complete the required fields.
The flow returns to Main Flow Step 3.
6b. If the complaint cannot be submitted, the system displays an appropriate error message.
The flow returns to Main Flow Step 6.

View Booking History

Primary Actor: Student
Main Flow:
1. The Student opens the booking history section.
2. The system retrieves the Student's previous facility bookings.
3. The system displays the booking details and status.
4. The Student views the required booking information.
Alternative Flow:
2a. If there are no previous bookings, the system displays that no booking history is available.
The use case ends.

View Leave History

Primary Actor: Student
Main Flow:
1. The Student opens the leave history section.
2. The system retrieves the Student's previous leave applications.
3. The system displays the leave details and status.
4. The Student views the required leave information.
Alternative Flow:
2a. If there are no previous leave applications, the system displays that no leave history is available.
The use case ends.
