- The Student enters Student ID, personal details, contact details, academic details, parent details, and ID proof.
- The Student selects the hostel and provides the required room information.
- The system validates the entered details.
- The system creates the student account.
- The system confirms successful registration.

Alternative Flow:

- If any required information is missing or invalid, the system displays an error message and asks the Student to correct the details.
- If the Student ID already exists, the system informs the Student and prevents duplicate registration.

Login

Primary Actor: Student
Main Flow:

- The Student opens the login page.
- The Student enters valid login credentials.
- The system verifies the credentials.
- The system authenticates the Student.
- The system displays the Student dashboard.

Alternative Flow:

- If the credentials are incorrect, the system displays an error message and asks the Student to try again.

Manage Profile

Primary Actor: Student
Main Flow:

- The Student opens the profile section.
- The system displays the Student's profile information.
- The Student views or edits the required details.
- The Student updates the information.
- The system validates and saves the updated details.
- The system displays the updated profile.

Alternative Flow:

- If the entered information is invalid, the system displays an error message and does not save the changes.

View Notifications and Announcements

Primary Actor: Student
Main Flow:

- The Student opens the notifications section.
- The system displays available notices and announcements.
- The Student views the required notification.
- The system updates the notification as read.
- The Student can view emergency alerts, fee reminders, and maintenance alerts.

Alternative Flow:

- If there are no new notifications, the system displays that there are no new notifications.

View Room Details

Primary Actor: Student

Main Flow:

- The Student opens the room details section.
- The system displays the allocated room information.
- The Student views room capacity and bed availability.
- The system displays the room maintenance status and related room information.

Alternative Flow:

- If room information is unavailable, the system displays an appropriate message.

Book Common Facility

Primary Actor: Student

Main Flow:

- The Student opens the common facility booking section.
- The system displays the available facilities.
- The Student selects a facility.
- The system displays available date and time slots.
- The Student selects a suitable slot and submits the booking.
- The system confirms the booking.
- The booking is added to the Student's booking history.

Alternative Flow:

- If the selected time slot is unavailable, the system asks the Student to select another slot.
- If the facility is under maintenance, the system prevents booking and displays the maintenance status.

Manage Fees and Payments

Primary Actor: Student

Main Flow:

- The Student opens the fee and payment section.
- The system displays fee details, due dates, fines, and dues.
- The Student selects the required payment option.
- The Student completes the online payment.
- The system processes the payment.
- The system updates the payment status.
- The system provides a payment receipt and stores the payment in the payment history.

Alternative Flow:

- If the payment fails, the system displays the payment failure status.
- If the payment gateway is unavailable, the system informs the Student that the payment cannot be completed.

Manage Mess

Primary Actor: Student

Main Flow:

- The Student opens the mess management section.
- The system displays the weekly menu and meal schedule.
- The Student views meal information.
- The Student can register for meals where applicable.
- The Student can view mess attendance, feedback, complaints, holidays, and mess fee information.

Alternative Flow:

- If mess information is unavailable, the system displays an appropriate message.
